Except as otherwise provided in Subsection B of this section, a building permit shall be required for any work which must conform to the Uniform Code and/or the Energy Code, including, but not limited to, the construction, enlargement, alteration, improvement, removal, relocation or demolition of any building or structure or any portion thereof, and the installation of a solid-fuel-burning heating appliance, chimney or flue in any dwelling unit. No person shall commence any work for which a building permit is required without first having obtained a building permit from the Code Enforcement Officer.
- B. Exemptions. No building permit shall be required for work in any of the following categories:
  - (1) Installation of swings and other playground equipment associated with a one- or two-family dwelling or multiple single-family dwellings (townhouses);
  - (2) Painting, wallpapering, tiling, carpeting, or other similar finish work;
  - (3) Installation of listed portable electrical, plumbing, heating, ventilation or cooling equipment or appliances;
  - (4) Repairs, provided that such repairs do not involve:
    - (a) The removal or cutting away of a load-bearing wall, partition, or portion thereof, or of any structural beam or load-bearing component;
    - (b) The removal or change of any required means of egress; or the rearrangement of parts of a structure in a manner which affects egress;
    - (c) The enlargement, alteration, replacement or relocation of any building system; or
    - (d) The removal from service of all or part of a fire protection system for any period of time.
- C. Exemption not deemed authorization to perform noncompliant work. The exemption from the requirement to obtain a building permit for work in any category set forth in Subsection

B of this section shall not be deemed an authorization for work to be performed in violation of the Uniform Code or the Energy Code.

D. Applications for building permits. Applications for a building permit shall be made in writing on a form provided by or otherwise acceptable to the Code Enforcement Officer. The application shall be signed by the owner of the property where the work is to be performed or by an authorized agent of the owner. The application shall include such information as the Code Enforcement Officer deems sufficient to permit a determination by the Code Enforcement Officer that the intended work complies with all applicable requirements of the Uniform Code and the Energy Code. The application shall include or be accompanied by the following information and documentation:

- (1) A description of the proposed work;
- (2) The Tax Map number and the street address of the premises where the work is to be performed;
- (3) The occupancy classification of any affected building or structure;
- (4) Where applicable, a statement of special inspections prepared in accordance with the provisions of the Uniform Code; and
- (5) At least two sets of construction documents (drawings and/or specifications) which:
  - (a) Define the scope of the proposed work;
  - (b) Are prepared by a New York State registered architect or licensed professional engineer where so required by the Education Law;
  - (c) Indicate with sufficient clarity and detail the nature and extent of the work proposed;
  - (d) Substantiate that the proposed work will comply with the Uniform Code and the Energy Code; and
  - (e) Where applicable, include a site plan that shows any existing and proposed buildings and structures on the site, the location of any existing or proposed well or septic system, the location of the intended work, and the distances between the buildings and structures and the lot lines.

(6) All building permit applications shall include signed and sealed calculations by the design professional stating the "Building Area" and "Usable Floor Area" as defined in Section 216-4 of the Village Code. The calculations shall be reviewed and certified by the Village Engineer.

(67) Any additional documents required by the Code Enforcement Officer to determine that the proposed work will comply with the Uniform Code and the Energy Code.

- E. Construction documents. Construction documents will not be accepted as part of an application for a building permit unless they satisfy the requirements set forth in Subsection D(5) of this section. Construction documents which are accepted as part of the application for a building permit shall be marked as accepted by the Code Enforcement Officer in writing or by stamp. One set of the accepted construction documents shall be retained by the Code Enforcement Officer, and one set of the accepted construction documents shall be returned to the applicant to be kept at the work site so as to be available for use by the code enforcement personnel. However, the return of a set of accepted construction documents to the applicant shall not be construed as authorization to commence work, nor as an indication that a building permit will be issued. Work shall not be commenced until and unless a building permit is issued.
- F. Issuance of building permits. An application for a building permit shall be examined to ascertain whether the proposed work is in compliance with the applicable requirements of the Uniform Code and Energy Code. - H. Work to be performed in accordance with construction documents. All work shall be performed in accordance with the construction documents which were submitted with and accepted as part of the application for the building permit. The building permit shall contain such a directive. The permit holder shall immediately notify the Code Enforcement Officer of any change occurring during the course of the work. The building permit shall contain such a directive. If the Code Enforcement Officer determines that such change warrants a new or amended building permit, such change shall not be made until and unless a new or amended building permit reflecting such change is issued.
- I. Time limits. Building permits shall become invalid unless the authorized work is commenced within six months following the date of issuance. Building permits shall expire 12 months after the date of issuance. A building permit which has become invalid or which has expired pursuant to this subsection may be renewed upon application by the permit holder, payment of the applicable fee, and approval of the application by the Code Enforcement Officer.
- J. Revocation or suspension of building permits. If the Code Enforcement Officer determines that a building permit was issued in error because of incorrect, inaccurate or incomplete information, or that the work for which a building permit was issued violates the Uniform Code or the Energy Code, the Code Enforcement Officer shall revoke the building permit or suspend the building permit until such time as the permit holder demonstrates that all

work then completed is in compliance with all applicable provisions of the Uniform Code and the Energy Code and all work then proposed to be performed shall be in compliance with all applicable provisions of the Uniform Code and the Energy Code.

- K. Fee. The fee specified in or determined in accordance with the provisions set forth in § 74-18, Fees, of this chapter must be paid at the time of submission of an application for a building permit, for an amended building permit, or for renewal of a building permit. §

to comply with the Uniform Code or Energy Code. Work not in compliance with any applicable provision of the Uniform Code or Energy Code shall remain exposed until such work shall have been brought into compliance with all applicable provisions of the Uniform Code and the Energy Code, reinspected, and found satisfactory as completed.

- D. Fee. The fee specified in or determined in accordance with the provisions set forth in § 74-18, Fees, of this chapter must be paid prior to or at the time of each inspection performed pursuant to this section.
- E. The Code Enforcement Officer may retain, at the expense of the owner of the property, an architect or engineer to inspect the work, or a portion thereof, for compliance with the regulations of the Village or the New York State Uniform Fire Prevention and Building Code during the course of construction or after construction has been completed and prior to the issuance of a certificate of occupancy.

The Code Enforcement Officer shall cause the stop-work order, or a copy thereof, to be served on the owner of the affected property (and, if the owner is not the permit holder, on the permit holder) personally or by registered mail or certified mail at their last known address. The Code Enforcement Officer shall be permitted, but not required, to cause the stopwork order, or a copy thereof, to be served on any builder, architect, tenant, contractor, subcontractor, construction superintendent, or

their agents, or any other person taking part or assisting in work affected by the stop-work order, personally or by registered mail or certified mail; provided, however, that failure to serve any person mentioned in this sentence shall not affect the efficacy of the stop-work order.

- D. Effect of stop-work order. Upon the issuance of a stop-work order, the owner of the affected property, the permit holder and any other person performing, taking part in or assisting in the work shall immediately cease all work which is the subject of the stopwork order.
- E. Remedy not exclusive. The issuance of a stop-work order shall not be the exclusive remedy available to address any event described in Subsection A of this section, and the authority to issue a stopwork order shall be in addition to, and not in substitution for or limitation of, the right and authority to pursue any other remedy or impose any other penalty under § 74-17, Enforcement; penalties for offenses, of this chapter or under any other applicable local law or state law. Any such other remedy or penalty may be pursued at any time, whether prior to, at the time of, or after the issuance of a stop-work order.

The Code Enforcement Officer shall issue a certificate of occupancy if the work which was the subject of the building permit was completed in accordance with all applicable provisions of the Uniform Code and Energy Code and, if applicable, the structure, building or portion thereof that was converted from one use or occupancy classification or subclassification to another complies with all applicable provisions of the Uniform Code and Energy Code. The Code Enforcement Officer or an inspector authorized by the Code Enforcement Officer shall inspect the building, structure or work prior to the issuance of a certificate of occupancy. In addition, where applicable, the following documents, prepared in accordance with the provisions of the Uniform Code by such person or persons as may be designated by or otherwise acceptable to the Code Enforcement Officer, at the expense of the applicant for the certificate of occupancy, shall be provided to the Code Enforcement Officer prior to the issuance of the certificate of occupancy:
